I am not sure how all that happened with respect to Dave attending as I was not there. I am getting in touch with Angeles so we can give you a joint update as it was an EPA requested meeting.

Greg

Last week on March 2, Dave Davis drove to Yerington to attend and listen in to the meeting. When he arrived there was no one present. He asked the clerk about the meeting and Dave was told that an EPA meeting was planned and Dave was told that the meeting was only open to "administration". Dave waited outside for an hour and did not observe any attendee's to the building and then drove back to Reno.

Any updates?

Thanks
Gene
